

# Arosa II

T Grid Lighting Solutions for

**Office, Commercial, Education  
and Retail applications.**

Arosa is an innovative lighting solution to work on 15mm and 24mm T grid ceiling system. While UGR is rated as low as 16 (Black reflector), it can achieve over 105lms/W. With its patent pending hanging structure, Arosa can be linked smoothly from one to another to create better ceiling image.

## Arosa T Grid Lighting Solution Product Options:

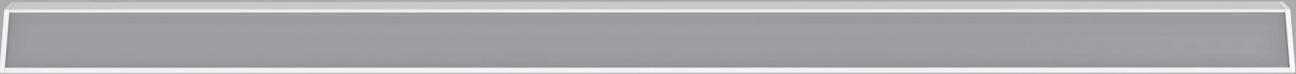

### Arosa II-B

### Arosa II-P

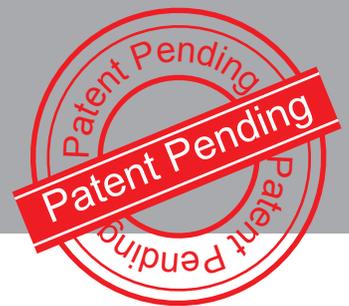

### Arosa II-W

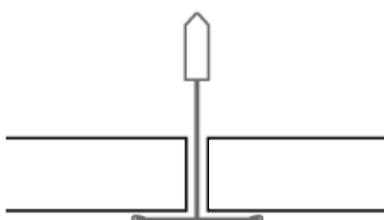

Standard Lens Beam Angle 90° , optional 30° and 60° .

Standard Length: 600mm and 1200mm.

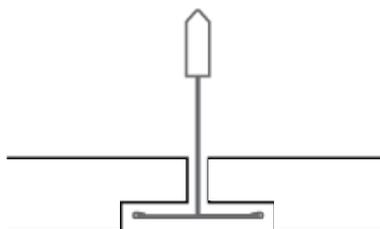

Other length available by request.

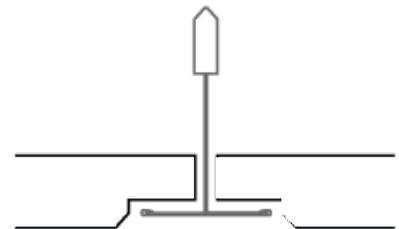

**Arosa range can work with different tile edges on 15 and 24mm T bars.**

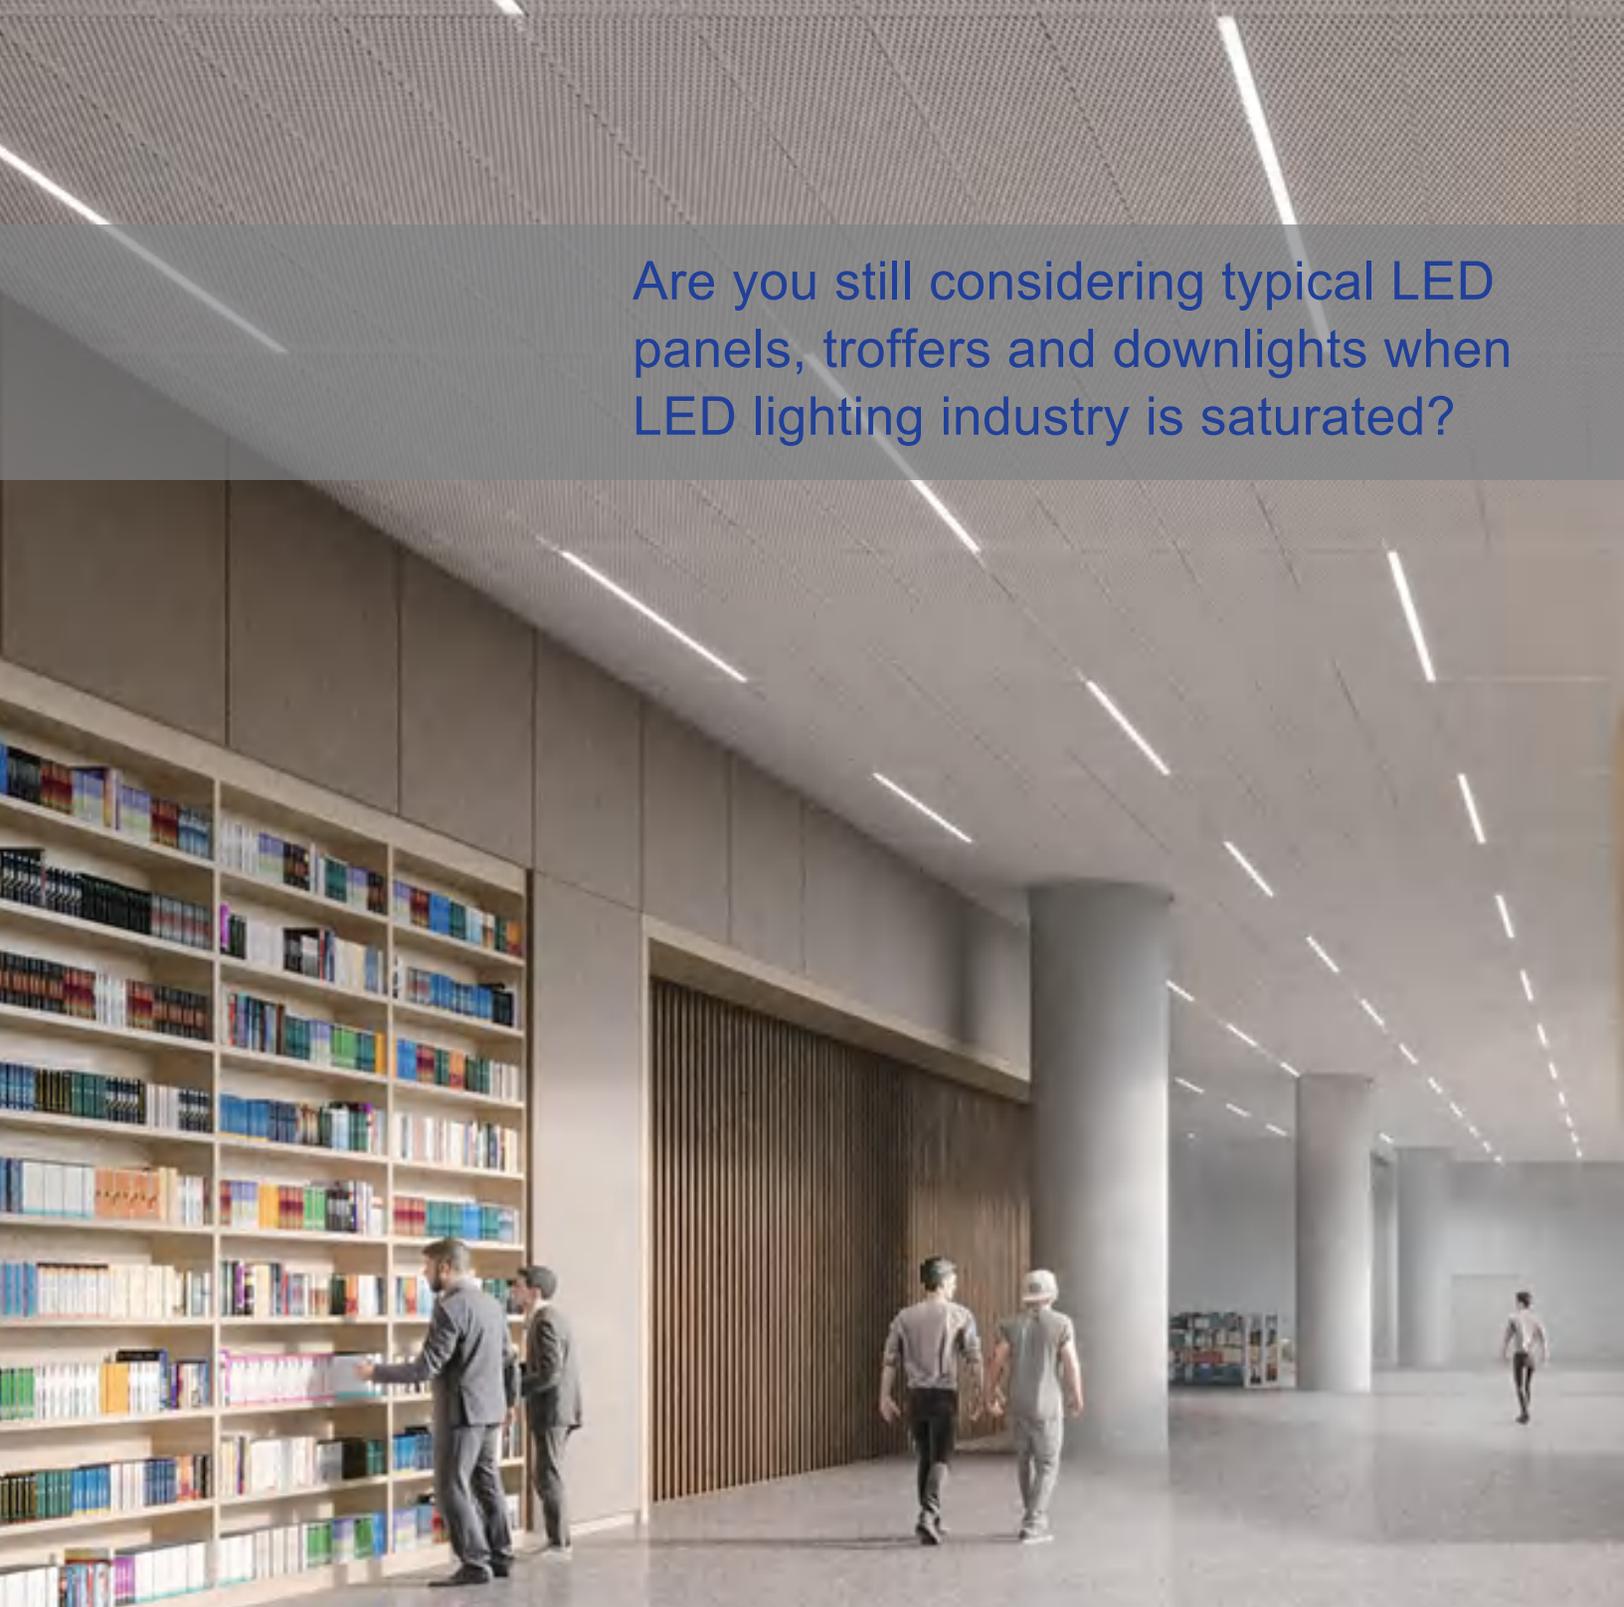

**SQUARE  
EDGE**

**TEGULAR  
EDGE**

**BEVELED TEGULAR  
EDGE**

Are you still considering typical LED panels, troffers and downlights when LED lighting industry is saturated?

After years of LED lighting business development, the full lighting market is flooded with LED 600x600, 600x1200 panels, troffers and round downlights. They are good, but they are just as the same as historical fluorescent lighting modules.

Victroncis is introducing an innovative, effective and refined lighting solution Lynco that creates better ceiling appearance and gives great benefits to the whole supply chain.

# Key Benefits to full Supply Chain

## ■ Customer / Designers

- Elegant appearance of space
- Flexibility for creativeness of customers and designs
- Reduce overall project costs (materials and labours)
- Even light distribution

## ■ Installers / Contractors

- Simple installation procedures
- Low maintenance required
- Light weighted and easy for installation

## ■ Wholesaler / Distributors

- Products with unique selling points
- Reduce warehouse and logistic costs
- Long service life. Lifetime is determined by the power supply
- CC and CV version both available by request

# Arosa II

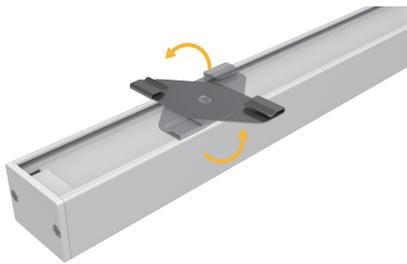

An innovative lighting product solution for T-Grid suspension ceilings.

Remarkable Installation Savings

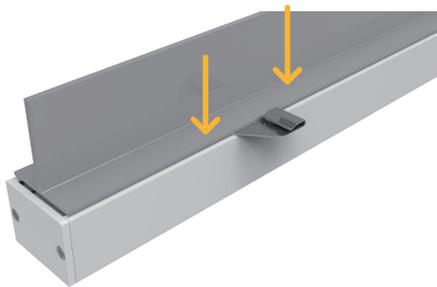

Up 60% faster installation

Over 40% material cost saving

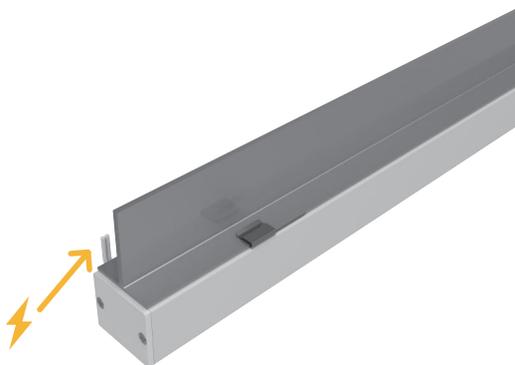

## Installation steps:

1. Move the hanger toward to the end cap as much as possible and turn the hanger vertically to the light fitting.

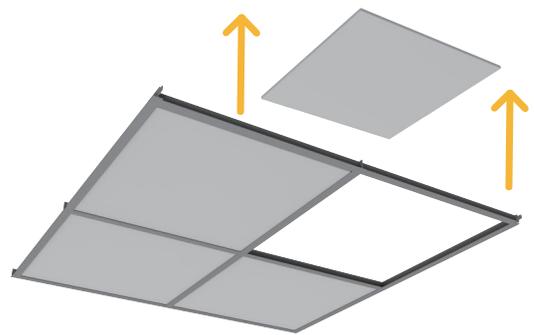

3. Place Arosa under the T bar closely.

5. Place the Low Voltage cable alongside the T bar and connect to DC 48V power Supply.

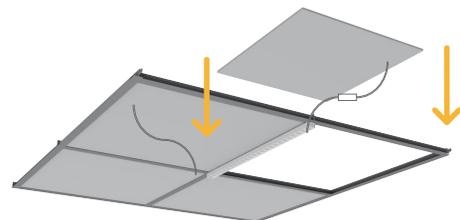

7. Now the installation is completed.

2. Remove the tiles from the T grid for easy installation.

4. Turn the hanger clockwise and lock the hanger to the T bars.

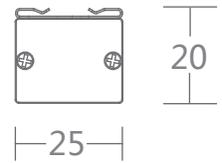

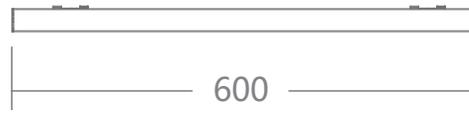

6. Place the tiles back to the ceiling.
